

Adding Links to Your Sidebar(s)

To add a link to your sidebar, start by clicking on the *Links* tab in your *Dashboard*. In the *Name* box, type the name of the website (this is what your readers will see when they view your sidebar rather than the actual web address). Type or copy and paste the *Web Address*. If you add a *Description*, when your readers mouse over the link, your description will appear as a pop-up.

To organize your links under specific headings in your sidebar, scroll down the *Add Categories* link. You can create as many link categories as you like. New categories will not appear in your sidebar until you've actually assigned a link to them. If you don't feel the *Blogroll* has enough space for all your links, you could also create Pages for your links, such as a Math Page with links, or a Teacher's Resources Page.

Note: If your *Blogroll* does not appear in the sidebar, you will need to return to the *Design* screen and drag and drop the *links* widget into your sidebar.

Post Page **Link**

Welcome to the all new Edublogs! We've upgraded you to the latest version of WordPress and are busy squashing bugs and adding features all weekend. If you spot a bug and are on Twitter, send us an @edublogs message to help us out :) Or drop by [the forums](#).

Sue Waters posts a quick tour of the new backend (video included) over at [The Edublogger!](#)

Are you interested in how to add email subscription to your blog? [read on.](#)

Add Link

Name

Area 3 Writing Project
Example: Nifty blogging software

Web Address

http://a3wp.edublogs.org
Example: http://wordpress.org/ — don't forget the http://

Description

Resources and information by and for writing teachers
This will be shown when someone hovers over the link in the blogroll, or optionally below the link.
